

# DISCOVERY BOTTLES!

Glycerine & Glitter - it is much more effective than it looks in the picture and very relaxing.

Hair Gel and Marbles

Marbles in Shampoo.

Good for comparing with the Marbles in Hair Gel, to see the different ways the marbles behave in each.

Animals hidden in shredded paper. Lots of twisting and turning of the bottle required to get the animals to appear.

## Car in Rice.

We use this one to learn about the different parts of a car. Can you see the wheels / windows / lights / mirrors etc.

## Cut up pipe cleaners.

Use magnetic wands to draw the pipe cleaners up the side of the bottle.

Paper clips in de-stilled water to demonstrate that magnetism also works in water.

## Colored Water and Oil

Add a plastic fish in this one!
